EDUCATION

Virginia Tech, College of Engineering

B.S. Computer Science, Summa Cum Laude

Blacksburg, VA

Aug 2021 – May 2024

- GPA: 3.9, Six consecutive Dean's List Awards
- Related Coursework: GUI Programming in React, Mobile Software Development, Introduction to AI, Data Structures and Algorithms, Data and Algorithm Analysis, Computer Systems, Computer Organization, Comparative Languages, Professionalism in Computing, Statistics for Engineers, Applied Combinatorics

George Mason University, Volgenau School of Engineering

B.S. Computer Science

Fairfax, VA

Transferred out Aug 2020 – May 2021

- GPA: 3.9, Two consecutive Dean's List Awards
- Related Coursework: Object-Oriented Programming, Computer Programming, Essentials of Computer Science

EXPERIENCE

AI Engineering Intern

Zyglio, Inc.

February 2025 - Present

Reston, VA

- Develop an AI-powered simulation system leveraging Microsoft AutoGen to coordinate multi-agent workflows.
- Research and integrate cutting-edge AI techniques into an automated SME interview and simulation system.
- Collaborate with a cross-functional team to implement an intuitive and educational simulation software.

Undergraduate Teaching Assistant

Virginia Tech

August 2022 – May 2024

Blacksburg, VA

- Enhanced the learning experience of students across Java and Python programming courses.
- Conducted informative office hours and delivered educational assistance to a diverse student body.
- Orchestrated seamless communication among assistants to promptly address student inquiries and support needs.

Front End Engineering Intern

Ora

December 2023 – March 2024

Blacksburg, VA

- Deployed an AI-powered fitness web application leveraging Next.js, Supabase, Docker, and LLMs.
- Developed a complex yet user-friendly application, employing Typescript for front-end and Python for back-end.
- Collaborated with cross-functional teams to seamlessly integrate ideal visual design and back-end functionality.

PROJECTS

Brain Flow Visualization | <https://doi.org/10.1145/3611314.3625831>

Virginia Tech

- Collaborated with a team of FBRI researchers to automate the data visualization of brain tumor flow.
- Processed conditioned 3D scalar and vector field data sets to visualize brain tumor growth projections.
- Presented at VTURCS Research Symposium and published research to the Association of Computing Machinery.

VT Course Management System | *React, Python, Flask, MongoDB, Git*

Virginia Tech

- Led a team of software engineers to develop a comprehensive course management system for Virginia Tech.
- Implemented a chatbot feature to assist in academic planning by providing personalized course recommendations.
- Utilized React for front-end and Python for back-end to ensure a seamless and robust system architecture.

LEADERSHIP & ACTIVITIES

Co-Founder/Event Coordinator

Data Structures and Algorithms @ VT

September 2022 – May 2024

Blacksburg, VA

- Collaborated with executive board to identify teaching topics and drive conversation in general body meetings.
- Orchestrated and executed a series of highly engaging and informative workshops, study sessions, and socials.
- Initiated relations with companies and CS-related organizations to organize mock interviews and speaker events.

TECHNICAL SKILLS

Languages: Java, Python, Javascript, Typescript, HTML/CSS, Swift, Kotlin, C

Frameworks: React, Flask, Next.js, Node.js, JUnit, Material-UI, Bootstrap, FastAPI

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, Eclipse
